Tutorship currently available

In 2018 the program will be offered to:

- Grade 9 learners who would like to boost their marks for acceptance into Grade 10 Mathematics.
- Grade 11 learners who would need their Maths results for university applications.
- From 2019, the program will be offered to all High School learners.

At Pearson, we believe learning isn't a destination, starting and stopping at the classroom door. It's a never-ending road of discovery, challenge, inspiration, and wonder.

Education helps people progress throughout their lives and, at Pearson, we take learning personally. As South Africa's leading learning company we continue to create the best-selling content for South African schools. Our recognised and trusted learning brands such as *Platinum*, *Spot On*, *Focus*, *Smart Kids* and *X-Kit Achieve* continue to support teachers and motivate learners. We offer the largest range of CAPS approved titles in the country, available in print and digital format.

Pearson cultivates a love of learning that enables a lifetime of progress.

Because wherever learning flourishes, so do people.

Maths Tutorship

Calculate, expand, simplify

Build your Maths skills
through our engaging and interactive tutorship programme

At Pearson, we recognised the need to create a Maths tutorship programme that is geared towards dealing with learner-specific stumbling blocks in Maths, making the programme truly beneficial to every child that takes part.

Our Maths Tutorship Programme is an engaging and interactive programme that was specifically designed to improve your child's mathematical skills and boost their confidence to achieve their goals.

Facilitated by a qualified Maths teacher, learners benefit from a small-group environment where they enjoy individual attention, support, and encouragement from the tutor, while working alongside their peers.

How the programme works

The programme is facilitated by a qualified Maths teacher and offers learners 8 lessons per month (2 per week), each lasting 1.5 hours.

Learners will receive a free optional lesson once a week, on either a Friday or Saturday, during which individual queries will be dealt with.

Each lesson follows a set structure

Tuition material

On registration, learners will receive a file with the annual year planner. As they progress through topics, they will receive the learning material relevant to the topic, filling up their file as the weeks progress. This helps to break down the work that needs to be covered so the learner does not feel overwhelmed.

Learners will receive access to X-kit Achieve Mobile, an app that provides the theory they require for each topic and levelled quizzes to test their knowledge. Learners, parents and the tutor can use this platform to monitor progress and engagement.

Programme fees

Our Maths Tutorship Programme costs only R800 per month.

Breaking it down, each lesson costs R100 and you receive four free optional lessons per month *plus* all the materials your child needs for the programme.
