

Horizon

Discover a digital learning solution designed to improve student engagement

Discover Horizon

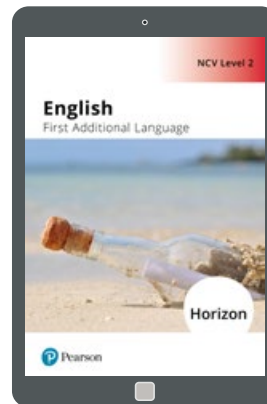

Horizon is a digital learning solution to create an optimal student engagement and teaching experience.

Get all the benefits of NCV curriculum-aligned multimedia and interactive content, eBook, supporting resources, activities and assessments with immediate grading, within an easy-to-use, digital learning platform.

The solution provides you and your students maximum flexibility. Lecturers can deliver engaging content front of class. Students can complete coursework on campus or independently from home.

Horizon includes:

- Student Book (eBook)
- Lecturer Guide (eBook)
- Multimedia and interactive content
- Student and class activities
- Assessments with immediate grading
- Lecturer dashboard to track student results
- Lecturer and student manuals

Currently available: English FAL Level 2

ISBN

9781485720201

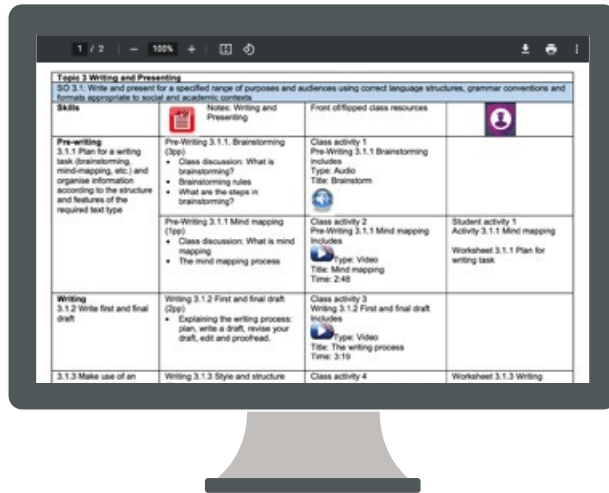

RRP

R255 per license per user (valid for 1 year)
Free lecturer license with class adoption

FORMAT

Mobile App – compatible with mobile, tablet, laptop and desktop

Horizon allows you to:

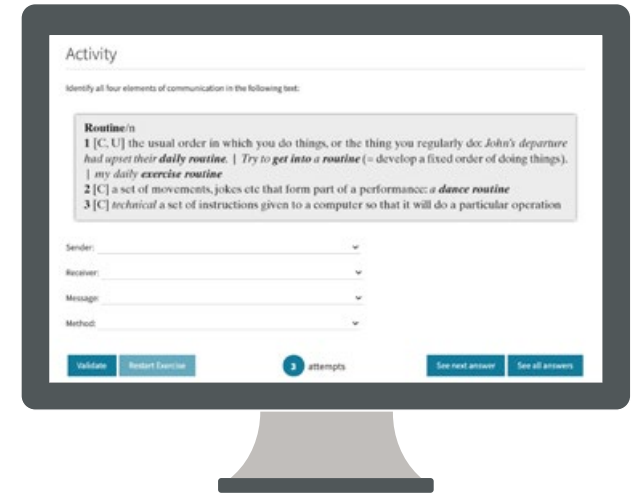

Deliver curriculum-aligned content digitally

Content is broken down into separate topics. Topics show the subject outcomes and each subject outcome includes content, activities and worksheets aligned to the learning outcomes.

Engage students with interactive front-of-class teaching

Use multimedia and interactive content to deliver engaging lectures and teach difficult concepts visually. Lessons include activities to engage students. Download standalone resources once and play them offline.

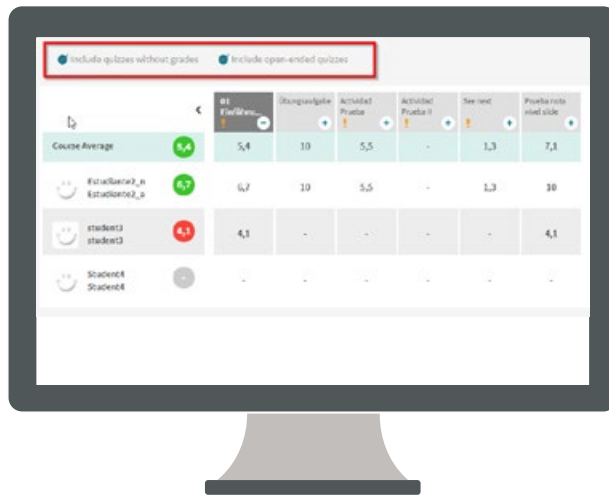

Manage activities and assessments

Assign student activities as homework and use class activities as individual, peer or group assessments. Activities and assessments are aligned to learning outcomes.

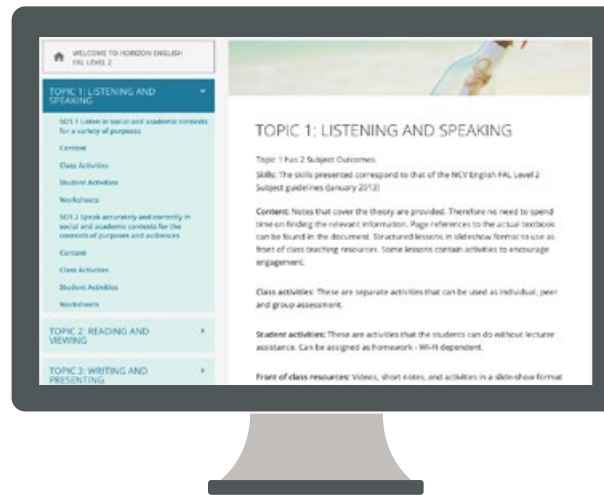

Designed with you, the lecturer, in mind, Horizon features the tools you need to make your lectures engaging and improve your students' results.

Horizon allows you to:

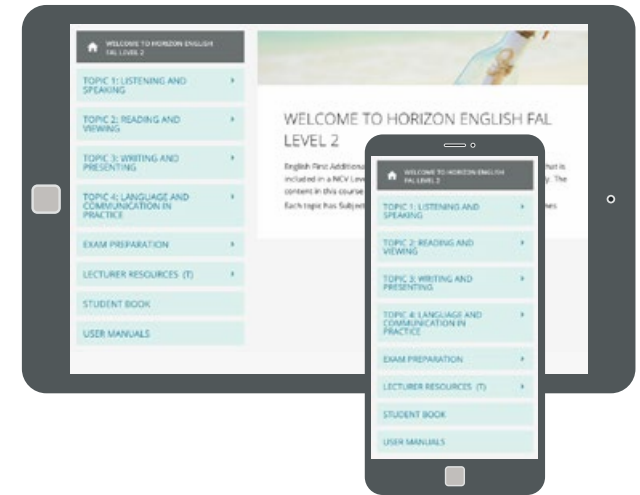

Track student performance

Access a dashboard that provides detailed reports and learning analytics to track student progress. Assessments can be completed offline but students and lecturers are required to go online to sync data.

Promote independent studying

Empower students to access content and resources. Students can complete self-marking activities offline and get immediate feedback. Students can access past exam papers to prepare for tests and exams.

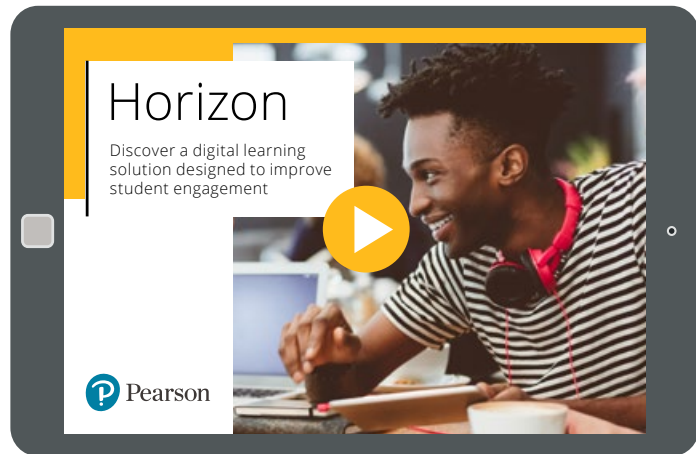

Offer flexible study options

Give students instant access to course content, multimedia resources and activities that can be accessed on mobile, tablet, laptop or desktop.

"The digital platform is user-friendly and visually appealing for both students and lecturers. Horizon is a very welcome addition to our English teaching resources, especially during lockdown while our classes are exposed to remote learning."

Senior Lecturer, NCV, College of Cape Town

“This is something that English lecturers have always been asking for: useful, subject-based digital content already designed and aligned to our syllabus.

For years, English lecturers have been tasked with designing their own digital content which they sadly do not always have the time for. This platform is therefore, a lifesaver!”

Senior Lecturer, NCV, College of Cape Town
