

Law

Higher Education Catalogue

Welcome to the Pearson Higher Education Catalogue for Law

We believe that Law students bring about positive changes in their communities and, at Pearson, we want to provide resources that help them acquire the skills they need to be the most sought-after candidates in the workplace.

This catalogue features our latest titles, our engaging interactive eBooks with enhanced digital content, and a range of digital solutions to support learning and teaching.

At Pearson, we are proud of our history of and experience in helping learners of all ages and stages find their path to a rewarding and fulfilling career.

Because wherever learning flourishes, so do people.

The future of jobs & skills

The conversation about the future of jobs & skills is one of the most important in education.

 **35%** of all jobs in South Africa are currently at risk of total automation

Much of the current conversation about the future of work revolves around fears of technology making workers obsolete. It imagines a world where people are relegated to unemployment or meaningless work by advances like driverless cars and artificial intelligence. But, if we are only talking about how automation will change the nature of work or about machines replacing human workers, we're missing the bigger picture.

We know that trends such as urbanisation, globalisation, sustainability, and increasing inequality – along with emerging technology – will all have significant influence over our job market. Fears of technologically-driven unemployment are nothing new. But historically, technology actually creates more jobs than it destroys. Our research¹ shows that the future of work is brighter than you might think. Many jobs we recognise today will still be in demand by 2030 and beyond. However, these jobs may require different skills for success tomorrow.

So what is the best way to prepare students for this future?

We need to cut through the scary headlines so educators, students, and employers can focus on taking a new, more dynamic approach to education and the careers that drive all of us to a better job and a better life. Research shows that if South Africa can double the pace at which its workforce acquires skills relevant for human-machine collaboration, it can reduce the number of jobs at risk from **35% to 14%**.²

Education systems will need to move beyond generic definitions of **21st century skills** and support better understanding, teaching practice, and assessment of the granular skills that will be in greater demand. As the pace of change accelerates, students will also demand more ways to convert learning to earning. More students will want accelerated and flexible pathways, such as credentials or badges.

At Pearson, preparing people for the jobs of the future is core to our mission of helping people make progress in their lives through learning. We are constantly re-evaluating the skills your students will need for a digital future, and developing the tools and solutions that can help you to prepare them for success in the workforce of tomorrow.

1 Future of Skills: Employment in 2030 Research Study, (2017), conducted by Pearson in partnership with Nesta and Oxford Martin School: <https://futureskills.pearson.com>

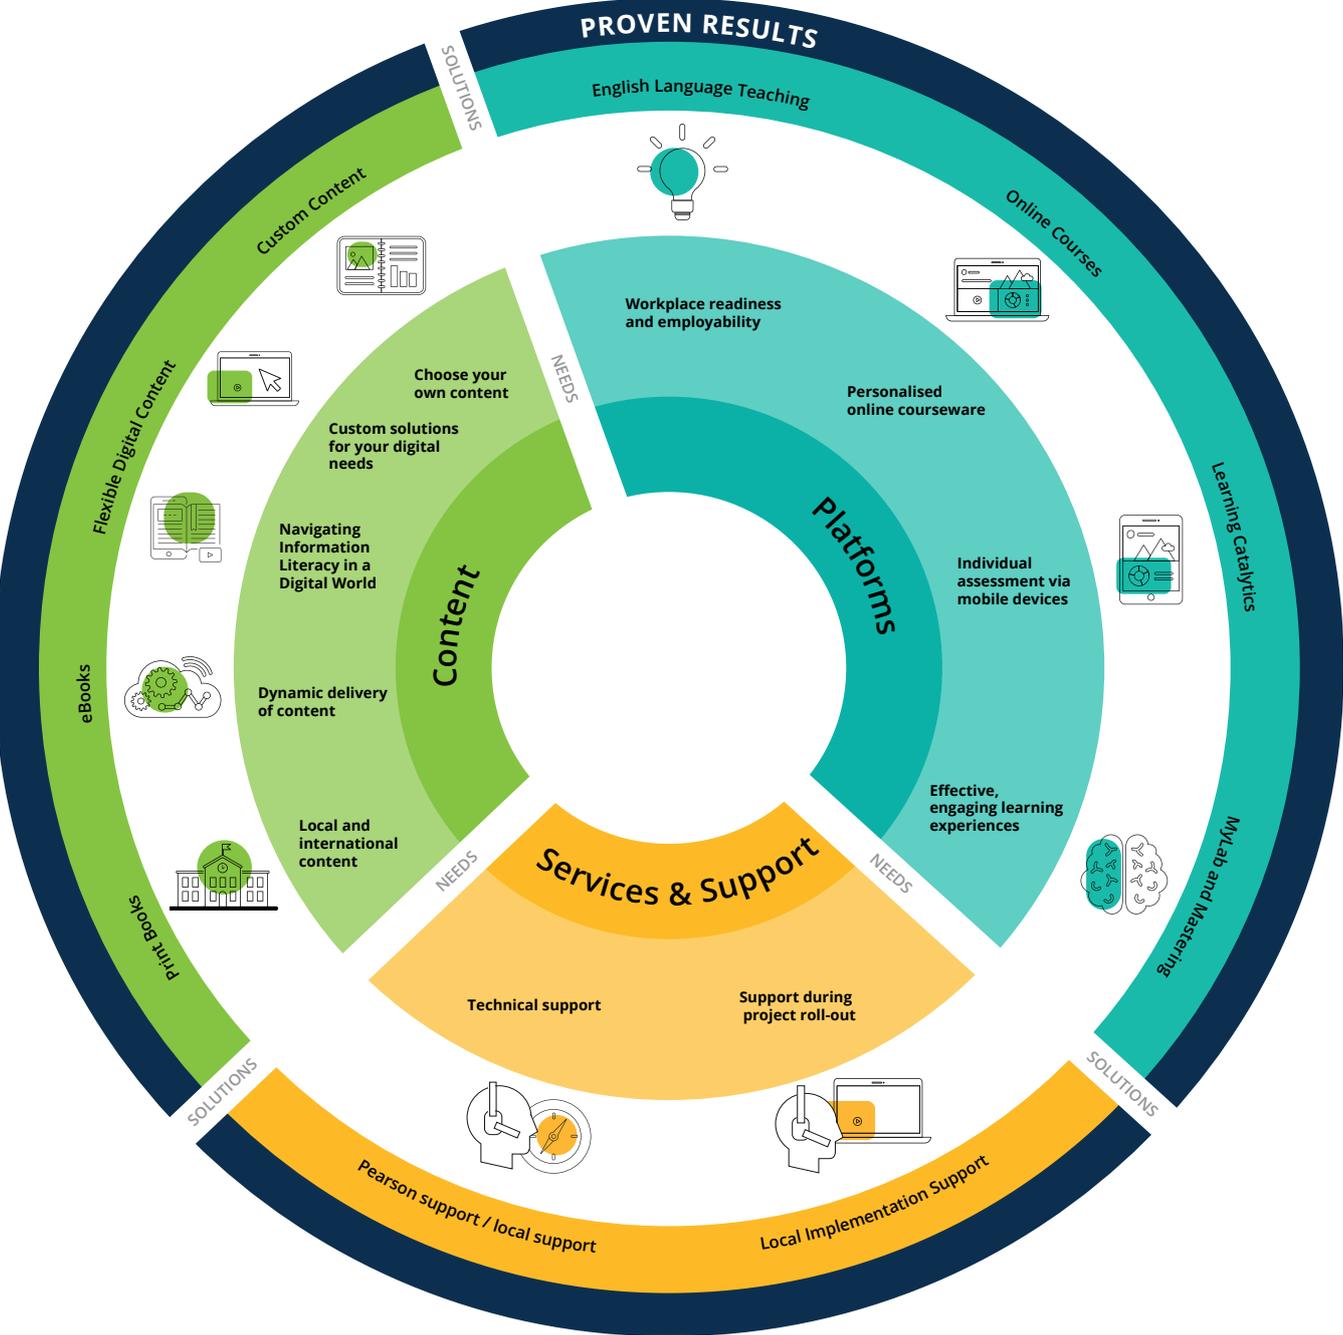

2 Creating South Africa's Future Workforce, (2018), conducted by Accenture Consulting.

Pearson Learning Solutions Guide

Our trusted and effective learning solutions – a blend of content, digital solutions and services – are designed to help you and your students succeed.

This visual guide will help you find the right Pearson solutions for you and your students. The inner circle summarises how our locally-relevant, customisable solutions optimise and enrich your teaching. Your Pearson Key Account Manager can guide and support you in making the most suitable choices for your institution and your course.

Digital Solutions

The digital sphere has become an intrinsic part of our everyday lives – from the way we stay in touch with our friends to the way in which learning is delivered.

By providing a range of digital learning solutions, we are making sure that your students receive content in an engaging medium and that they are geared towards success in a world where digital and 21st century skills are irreplaceable.

Mindful of the possibilities that digital content brings to the learning environment, we design our solutions to be locally relevant and to work across a variety of devices. We aim to help unlock the potential within students and lecturers and to ensure that they enjoy the benefits of digital learning.

eBooks

Pearson eBooks for higher education

To facilitate engaging learning, lecturers across South Africa are switching from traditional textbooks to eBooks. We offer a comprehensive range of Pearson eBooks in multiple formats, accessible both online and offline.

Our dedicated Implementation and Support team makes it easy to set up an eBook platform at your university. We also provide post-implementation support and training, if needed.

How do I purchase Pearson eBooks?

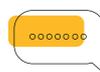

If you are a lecturer and you require eBooks for your institution, contact your Pearson Key Account Manager or Customer Services, who will assist you in implementing eBooks based on your needs.

If you are purchasing eBooks in small quantities, visit the Pearson eStore at shop.pearson.co.za. On purchasing a Pearson eBook access code, you will receive instructions on how to download your eBook.

Explore our eBook range at shop.pearson.co.za

Features of our Standard eBooks

Our standard eBooks are available as ePDFs and ePubs.

Personal notes in your eBook that you can find easily.

Download and view the entire book offline.

Highlight important sections that you can refer to at a later Create

Search for keywords or phrases with ease.

Enhance the experience with interactive eBooks

Our interactive eBooks are available as ePubs. They are enhanced with digital assets and offer interactive activities and media rich content that bring the text vividly to life, stimulate critical thinking and reinforce study skills.

Features of our interactive eBooks

Students pointed out that videos, glossary definitions and chapter review activities were the most effective learning objects that contributed towards improving the learning experience.

– Research on the use of Pearson Interactive eBooks at the University of Pretoria, 2015.

An informative introductory animation on how to use Pearson eBooks

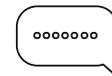

Highlighting and note taking

Exercises, such as matching pairs and drag-and-drop activities

Animations that bring the content across in an accessible and fun way

Glossary pop-ups, some of which are multilingual

Videos showing scenarios and highlighting big issues

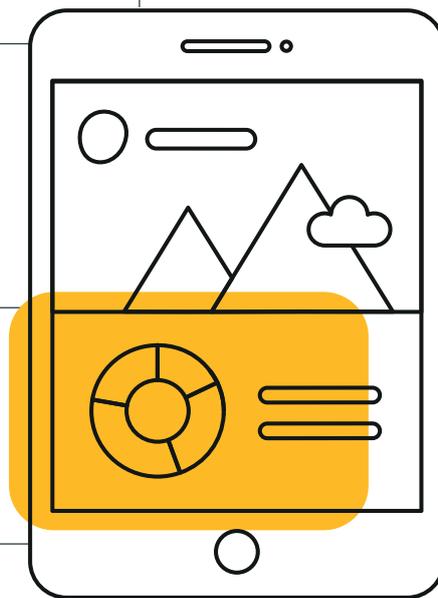

Infographics, some of which are interactive, providing a summary of information in one place

Interactive e-learning activities, including chapter reviews, case studies, scenario-based activities and self-assessment exercises

Audio podcasts of practitioners or lecturers putting theory into practice, or to provide concept revision

MyLab

Not every student learns the same way or at the same rate. With the growing need for acceleration through many courses, it's more important than ever to meet students where they learn.

MyLab is trusted by 11 million students around the world and in South Africa, over 100 000 students are using it

MyLab™ creates learning experiences that are personalised and adaptive. MyLab reacts to how students are performing, offering data-driven guidance that helps them better absorb course material and understand difficult concepts.

Benefits of MyLab

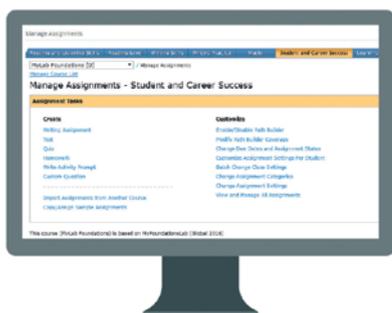

- **Deliver online course content**
Filled with a wealth of content, MyLab lets you add, remove or modify existing course content to meet the needs of your students.
- **Assign homework and tests**
Create and manage online assignments and tests that are automatically graded. Students can access MyLab off campus and learn at their own pace.
- **Manage class performance**
The MyLab Gradebook tracks your students' test and practice exercise results, helping you manage and calculate grades.
- **Improve students' grades**
View, analyse and report learning outcomes clearly. Use the information to keep your students on track throughout the course.

Core features

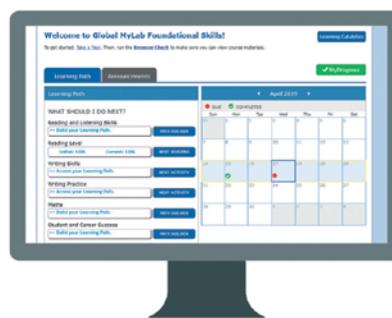

A powerful homework and test manager

MyLab lets you create, import, and manage online homework assignments, and tests that are automatically graded. You can choose from a wide range of assignment options, including time limits and maximum number of attempts allowed. MyLab means less time grading and more time teaching.

Comprehensive online course content

Filled with a wealth of content that is integrated with your textbook, MyLab lets you easily add, remove, or modify existing material. You can add your own course content to suit the needs of your students or department. In short, MyLab lets you teach exactly as you'd like.

Robust gradebook tracking

The online gradebook automatically tracks your students' results on tests, homework, and practice exercises and gives you control over managing results and calculating grades. The gradebook provides a number of flexible grading options, including exporting grades to a spreadsheet program such as Microsoft Excel.

Easily scalable and shareable content

MyLab enables you to manage multiple class sections, and lets other instructors copy your settings so a standardised syllabus can be maintained across your department. Should you want to use the same MyLab course with the same customised settings, you can copy your existing course and share it with other faculty members.

Available MyLabs

- MyLegalExperience
- MyLab IT
- MyLab Language
- MyLab Economics
- MyLab Psychology

Mastering

The world's leading collection of online homework, tutorial and assessment products designed with a single purpose in mind: to improve the results of all higher education students.

Each Mastering™ product is designed for a particular course, with a range of discipline specific features that have been thoughtfully created to maximise engagement and relevance. Mastering programs deliver consistent, measurable gains in student learning outcomes, retention, and subsequent course success.

Benefits of Mastering

- **Customise best-in-class content**
Mastering provides a rich and flexible set of pre-built courses and assignments to get you started quickly. These assets can be used as is or customised.
- **Personalise learning**
Using data gathered from all of the students using the program, Mastering offers wrong-answer feedback that is specific to each student.
- **Manage grades and assignments**
The Gradebook records scores for automatically graded assignments. The Calendar View displays upcoming assignments and due dates.
- **Guide students' performance**
Diagnostics provide insight into class and student performance. View charts that identify vulnerable students, and indicate score improvement.

Core features

A powerful gradebook

Struggling students and challenging assignments are highlighted in red, giving you a view of potential hurdles in the course. The Calendar View on the course home page displays upcoming assignments and due dates, so you can easily stay organised.

Diagnostics and insights

Diagnostics provide insight into class and student performance. With a single click, you can view charts that summarise the most difficult problems, identify vulnerable students, and indicate grade distribution and score improvement over the duration of the course.

Dynamic, best-in-class content

Content is driven by the performance of students. Mastering makes corrections to improve problems that have ambiguous answer choices, ineffectual detractors, or tricky language, and continue to strengthen each problem through ongoing review of the data generated by students.

Personalised learning

Using data gathered from all of the students using the program, Mastering offers wrong answer feedback that is specific to each student. Rather than simply providing feedback of the "right/wrong/try again" variety, Mastering guides students towards the correct final answer.

Available Mastering titles:

- MasteringChemistry
- MasteringPhysics
- MasteringA&P (Anatomy and Physiology)
- MasteringBiology

[Click here to view our wide range](#)

MyLegalExperience

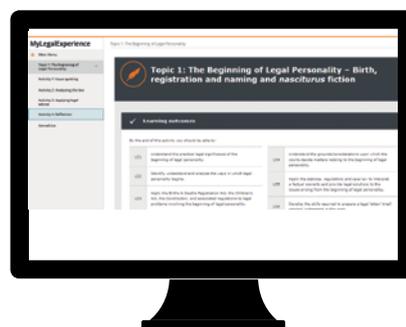

MyLegalExperience engages law students in practical activities with simulated real-world clients.

Students using MyLegalExperience role-play multiple legal roles in which they must identify, analyse and solve the legal issues raised before completing a practical task that demonstrates not only their legal knowledge but a variety of soft skills as well. These roles highlight how the law operates in a real-world context and support the development of key skills that students will need in their career.

Core features

Authentic client problems

Each simulation begins with an authentic client problem and is supported by a wide variety of case documents, such as witness statements, that students work through to identify the legal issues raised. Video and audio are used in the simulations.

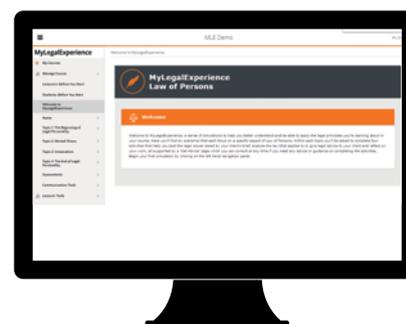

Multiple practice opportunities

Students put their legal skills into practice in a realistic context via the Applying Legal Advice activity. Example activities include drafting client letters of advice, drawing up contractual terms, preparing presentations and writing submissions to court.

Scaffolded activities

Each simulation contains 4 activities that are scaffolded so that they build up in complexity as students work through them. Activities are designed to reflect how students are typically expected to approach problem questions, developing this crucial skill.

Legal skills development

Immediate, coaching feedback and self-reflection are built into the activities. Students can access model answers with annotated feedback against which they can compare and reflect on their own answer.

MyLab IT

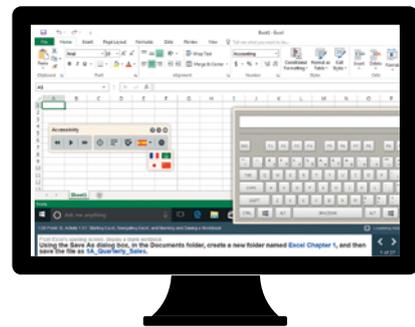

MyLab IT is the most innovative and personalised way in which to teach and learn digital literacy.

MyLab IT offers quality content, developed by practicing IT educators that can effectively integrate into training and assessment exercises to enhance students' knowledge of Microsoft Office applications and computer concepts needed for university and career success.

Core features

Microsoft Office simulations

Students train in a simulated Microsoft Office environment that offers realistic, high-fidelity, skill-based training and assessment scenarios. MyLab IT regularly revises eText and Grader Projects to capture Microsoft 365 updates, keeping the content current.

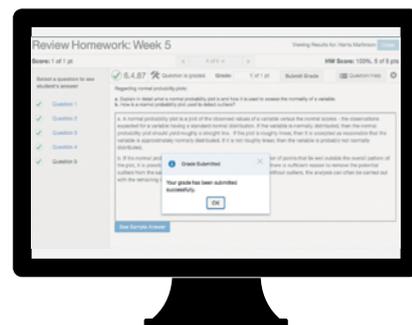

Activities and learning aids

Pre-built learning modules help lecturers create a pre-designed path of activities students need to follow. Activities can include simulations, Grader Projects and student resources to support effective learning. Students must master each activity before moving onto the next.

Automatic grading

Complete Grader Projects in Microsoft Office applications. Lecturers can assign projects that students will complete live in Microsoft Word, Excel, PowerPoint and Access, and submit for immediate grading by the MyLab IT grading engine.

Real-time labor market insights

Students earn badges showing employers that they're digitally literate and competent in Microsoft Office. They can explore career options that relate to the digital skills represented by your MyLab IT badge.

[Click here to learn more](#)

Learning Catalytics

An interactive student response tool that encourages team-based learning by using students' smartphones, tablets or laptops to engage them in interactive tasks and thinking.

As an instructor, you can pose a variety of open-ended questions that help your students to develop critical thinking skills, while monitoring responses with real-time analytics to find out where they are struggling. With this information, you can adjust your instructional strategy in real time and try additional ways of engaging your students in class.

Benefits of Learning Catalytics

Engage students with open-ended questions to develop critical thinking skills

Submit questions that require numerical, algebraic, textual, graphical, or multiple-choice responses. Questions require students to provide their own answer before the correct response is shared by the instructor, encouraging higher-level thinking.

Integration with MyLab and Mastering products

Take advantage of questions built specifically for Learning Catalytics and gradebook integration with a Mastering or selected MyLab product. Your students access Learning Catalytics at no cost when they purchase a Mastering or most MyLab products with an eText subscription.

Encourage team-based and collaborative learning for all students

Provide students with the structure for team-based and collaborative learning by engaging in discussion, articulating arguments, and resolving differences to reach a team consensus answer.

Bring in-person interactions to traditional, flipped, and online settings

Augment a traditional lecture, drive active learning in a flipped classroom, or bring the benefits of in-person interactions to completely asynchronous online courses.

Use technology in the classroom to find out where students are struggling

Identify misconceptions and monitor responses to find out where students are struggling. Use any device to keep track of how students are progressing in real time.

Encourage group learning

Automatically group students for discussion of a question based on their responses and location, regardless of class size.

In the past, class time was primarily discussion; now, it is primarily Learning Catalytics. Before class, students read their textbook, studied a presentation, or watched a podcast to get the background information. In class, we do Learning Catalytics. Applying their foundational knowledge during class while using Learning Catalytics helps them prepare for the summative assessment on exams.

Associate Professor, Science
Kirkwood Community College

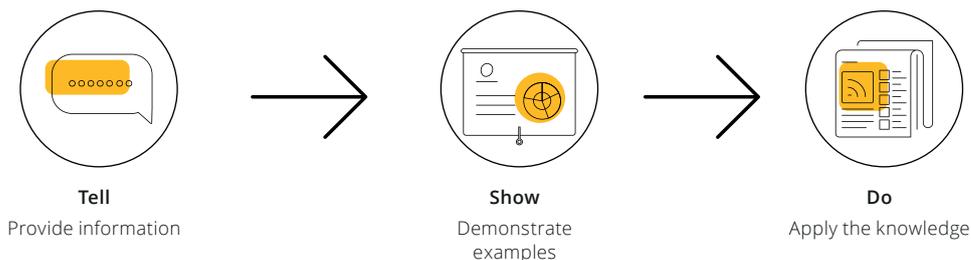

Digital Literacy Citizenship Course

Digital Literacy Citizenship is an online, modular and non-linear course for students who need to build their 21st-century digital literacy skills.

Individuals who complete this course receive a digital badge so they can easily share this achievement to popular on-line destinations, such as LinkedIn and Facebook, and employers can instantly verify their skills.

The training model is based on the 'Tell, Show, Do' approach which breaks away from the traditional lecture-based learning.

Benefits of Digital Literacy Citizenship

In completing this course, students will learn what it means to **CREATE** digital content, **COMMUNICATE** and **COLLABORATE** online, **USE** digital technology safely and effectively, **BEHAVE** appropriately, competently, **EVALUATE** online activity and **SEARCH** the internet efficiently.

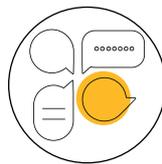

Intro

Understand the concept of digital citizenship and digital literacy.

Create

Learn how to analyse, create and use different kinds of online content.

Communicate

Learn how to evaluate online communication tools and platforms.

Collaborate

Learn how to use online collaboration tools and platforms.

Use

Learn how to recognise different types of technologies and to use them smartly.

Behave

Learn how to participate online in a responsible and ethical manner.

Evaluate

Learn how to recognise and analyse legitimate and relevant content online.

Search

Learn how to search effectively on the internet.

Exploring and experimenting is treated as a golden thread and runs through all seven sections, while legal and ethical issues are also included.

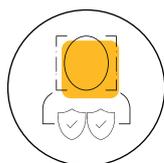

Learn more at za.pearson.com

Levels of ability

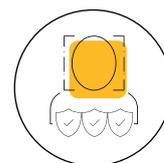

Beginner

For those who struggle with technology in general.

Everyday

For those who are used to some technology but need to boost their confidence and awareness.

Savvy

For those who are comfortable with technology but still need to improve their awareness of many of the behavioural, ethical or legal aspects of what they do.

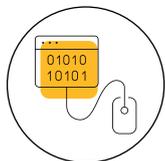

Pearson Horizon

An easy-to-use digital courseware solution that combines interactive digital content, online homework and assessments, optional eText and the flexibility to customise your course.

Pearson Horizon is a digital courseware solution for optimal student engagement. It promotes independent study by empowering students to access all content and activities online and offline.

The solution is available when purchasing Pearson eBooks, to give your students maximum flexibility to complete coursework on campus or through an online learning environment.

Benefits of Pearson Horizon

Make a strong transition to digital courseware

Get all the benefits of our widely used content within an easy-to-use, personalised digital platform with customisable features.

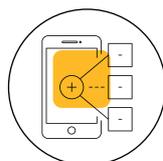

Optimise and personalise learning

Engage students with a blended learning approach merging digital content with complementary tutorials, and assessments.

Customise your course

Create a learning path with existing content, while developing original activities tailored to your course and uploading your own multimedia resources with an authoring tool.

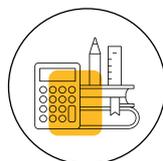

Offer flexible study options

Give students instant access to mobile-friendly course content, whether they're online or offline.

Support inclusive access

Provide local language content and custom interface for geographic relevance with mobile-friendly functionality via dedicated apps.

Integrates with learning and teaching tools

Access a powerful gradebook, learning management system, and detailed reports and learning analytics.

People expect digital and virtual learning to be the new normal in the next decade. Technology can enhance the learning experience and increase accessibility. Students today have the benefit of using technology to support their learning, which makes learning easier and more engaging.

Navigating Information Literacy in a Digital World

Being information literate is no longer a 'nice-to-have' skill; it is a skill essential to coping and succeeding in the 21st century.

Navigating Information Literacy in a Digital World, now in its 6th edition, has been redesigned to be 'digital-first'. This interactive eBook has been updated to cover the information skills needed for academic study, the workplace and everyday life. It emphasises the importance of being an ethical and digitally responsible citizen.

Benefits of Navigating Information Literacy in a Digital World

- **Dynamic learning experience**
Content is presented in manageable chunks to improve acquisition. Interactive content translates static content into a dynamic learning experience.
- **Activate prior knowledge**
Students engage actively with the content by manipulating instructional materials, which activates related prior knowledge.
- **Generate new knowledge**
Students integrate prior experience and learning with current activities to generate new knowledge.
- **Instructor resources**
Resources include test questions, PowerPoint slides with speaking notes and class discussion ideas.

Being information literate is an essential skill that everybody needs in a world where we are bombarded by huge amounts of digital information from a variety of sources, both credible and untrue. This eBook teaches you how to distinguish between good quality and fake information, both in an academic context, and in your everyday activities.

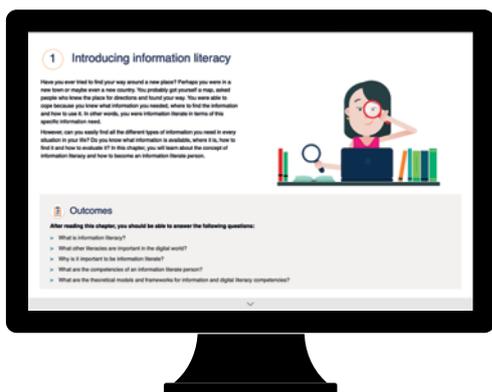

Prof. Theo Bothma

Core features

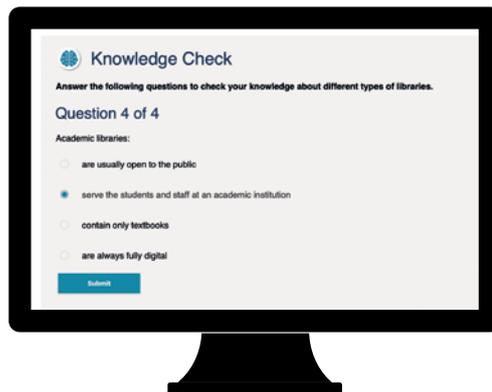

Structured and interactive content

Introductory chapter animations and instructional videos introduce content and explain concepts with real-world examples.

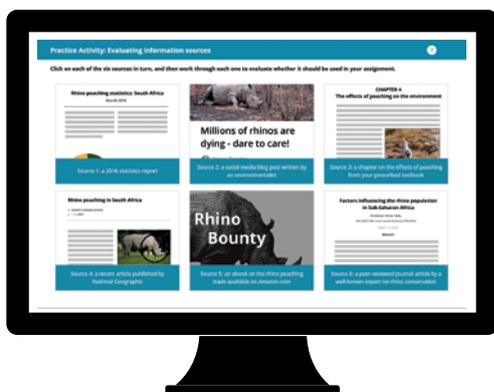

Self-evaluation and monitoring

'Knowledge check' activities are short formative assessments that enable students to check their theoretical understanding, and improve recall and retention of content.

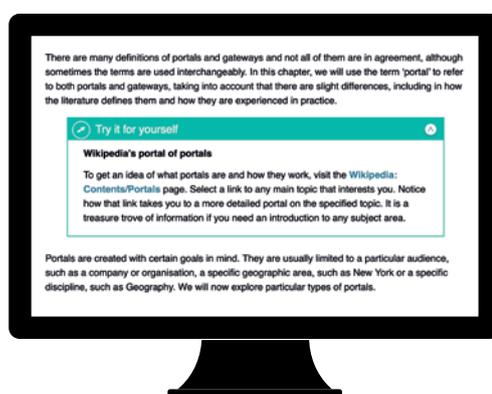

Real-world learning

Mini-simulations draw on situated learning theory where the user is 'situated' in the learning experience so knowledge acquisition becomes part of the learning activity.

Engaged learning environment

'Try it for yourself' activities enable learners to further apply their knowledge and skills, generate new knowledge, and work collaboratively.

Watch the video

See how the new interactive features bring information literacy to life for your students.

Content Solutions

To ensure that our content improves students' skills and inspires critical, creative and independent thinking, we believe in relevant and engaging learning.

We thoroughly research students' learning needs and shape our learning resources around these in order to maximise learning potential.

Because we believe in unlocking the potential in every student, we only work with respected educators and practitioners to author our books and support material. Our authors know and understand the South African Higher Education curricula, which helps them to create our industry-leading content that guides university students on their learning path towards success.

Experienced educators have long partnered with us to create world-class content. Working with Pearson, leading experts combine their pedagogical and discipline knowledge to create a solid foundation for an engaging learning experience.

Dr Benadette Aineamani, Director: Product and Services, Pearson

Guide to sampling & prescribing textbooks

With more than 60 000 international titles and a growing list of more than 200 local titles, we are confident that we can provide suitable material for almost any course.

Simply follow the steps below to make sure you find the most suitable book and that it is available for your students.

Sampling

1. Continue browsing our catalogue. To see our international solutions, browse the international Pearson Catalogue on <http://catalogue.pearsoned.co.uk>
2. Request a sample from your **Pearson Key Account Manager**.
3. Consider the textbook options:
 - Is the publisher's solution comprehensive and up to date?
 - Does it offer support for me and my students?
 - Will it engage my students and promote learning?
 - Does the price translate into value for money?
 - Will I receive after-sales support from the publisher?

Pearson can confidently answer 'yes' to all these questions

Prescribing a textbook

1. Lecturer confirms textbook prescription.
2. Lecturer advises Pearson and bookseller of the following:
 - Title
 - ISBN
 - Course name
 - Course code
 - Expected number of students
 - Semester
 - Technology component.
3. Key Account Manager grants lecturer access to various support resources, such as class presentations and test banks that complement textbook content.

Ordering prescribed books

1. Lecturer submits their selection to the Book List Administrator, as well as the Pearson Key Account Manager.
2. Bookshop places order.
3. Publisher ships.
4. How long does it take?
 - By ship: 6 weeks
 - By air: 3 weeks
 - Local book: 1–2 weeks
5. Bookshop sells to students.

Law titles

Pearson offers a wide range of international and local titles. We have provided a list of selected titles but should you like to view a more comprehensive list of titles, please contact a Pearson Key Account Manager.

Custom Solutions

Creating content for your unique needs – the most valuable learning takes place when content is tailored to the needs of your students.

Through Pearson Custom Solutions, you can create engaging content that inspires critical and independent thinking. Custom Solutions offer you and your students a range of benefits.

- Product is aligned to your course or academic programme and therefore there is no unnecessary or missing content.
- Choose and combine trusted and relevant academic content and support material authored by respected educators and practitioners or include content that you have written.
- Choose from print books, eBooks and online learning platforms.
- Add your institution's branding to online courses and book covers.
- Simplify your teaching and save time spent on accessing multiple resources during lectures.
- Save students money and give them access to everything they need in one solution.
- We will regularly review your requirements for amendments and changes.

The Custom process

Services & Support

Giving you comprehensive support is as important to us as providing you with quality content. That is why we have set up different platforms to support you where you may feel like you need help.

“Designing effective learning tools is only part of the solution. We ensure that you can implement our solutions with ease.”

Comprehensive support

With more than 60 000 international titles and a growing list of more than 200 local titles, we are confident that we can provide suitable material for almost any course.

Simply follow the steps below to make sure you find the most suitable book and that it is available for your students.

Sampling

1. Continue browsing our catalogue. To see our international solutions, browse the international Pearson Catalogue on <http://catalogue.pearsoned.co.uk>
2. Request a sample from your **Pearson Key Account Manager**.
3. Consider the textbook options:
 - Is the publisher's solution comprehensive and up to date?
 - Does it offer support for me and my students?
 - Will it engage my students and promote learning?
 - Does the price translate into value for money?
 - Will I receive after-sales support from the publisher?

Pearson can confidently answer 'yes' to all these questions

Prescribing a textbook

1. Lecturer confirms textbook prescription.
2. Lecturer advises Pearson and bookseller of the following:
 - Title
 - ISBN
 - Course name
 - Course code
 - Expected number of students
 - Semester
 - Technology component.
3. Key Account Manager grants lecturer access to various support resources, such as class presentations and test banks that complement textbook content.

Ordering prescribed books

1. Lecturer submits their selection to the Book List Administrator, as well as the Pearson Key Account Manager.
2. Bookshop places order.
3. Publisher ships.
4. How long does it take?
 - By ship: 6 weeks
 - By air: 3 weeks
 - Local book: 1–2 weeks
5. Bookshop sells to students.
